

# Capstone Project

- **Objective:**

The objective is to develop a comprehensive QA and test suite for the Sporty Shoes website. The QA effort will require the following:

1. Browser-based end-user testing using Selenium WebDriver with TestNG Framework.
2. Load Testing using JMeter.
3. API Testing with Cucumber.
4. API Testing with Postman and Rest Assured.

- **Tools Required:**

- Postman
- Java 11
- Maven
- Rest Assured Maven dependency version 4.5.1
- TestNG Maven dependency version 7.1.0
- JMeter
- Cucumber Dependencies
- Selenium, WebDriver dependency
- Eclipse IDE
- GitHub Account

- **GitHub Link:** <https://github.com/Shivam6190/Java-fsd>

- **Steps to complete the Capstone project:**

## Step 1: Opening the Website

## Step 1.1: Launch the Application under test

- Go to github URL <https://github.com/Simplilearn-Edu/SportyShoes.git>
- Click on Green button which has Code written on it. Click on Download Zip
- The download zip file will be in your download folder
- Extract all the files in downloads folder

## Step 1.2: Go inside the folder SportyShoes-main and then again go in the folder SportyShoes-main

## Step 1.3: Go inside the folder where you see the sporty-shoes-v1 jar file

## Step 1.4: Start cmd prompt in the same folder

Step 1.5: Execute the java command to run the jar file and deploy the application

java -jar sporty-shoes-v1.jar

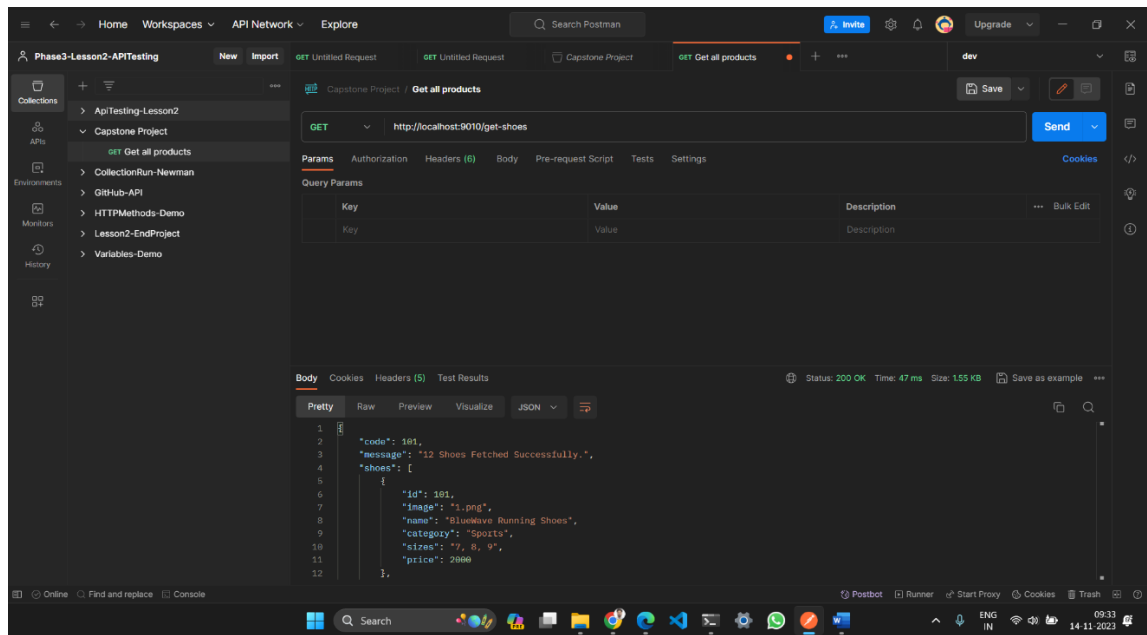

OR

java -jar -Dserver.port=8100 sporty-shoes-v1.jar

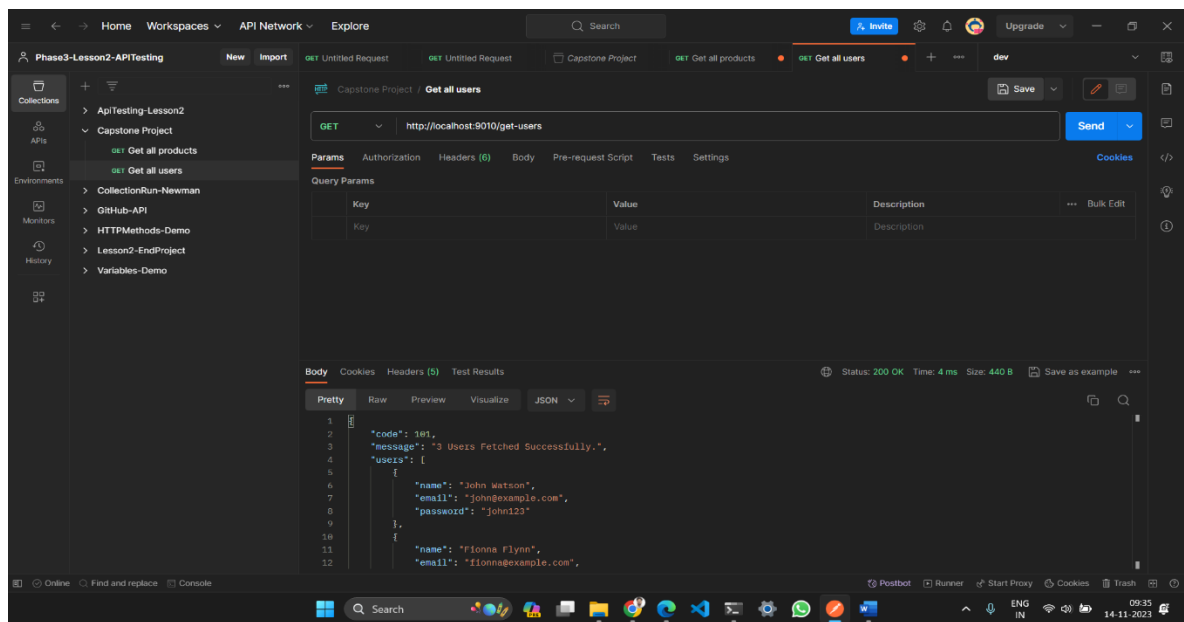

## Step 2: Implementing Postman Steps:

Step 2.1: Get all product using GET Request

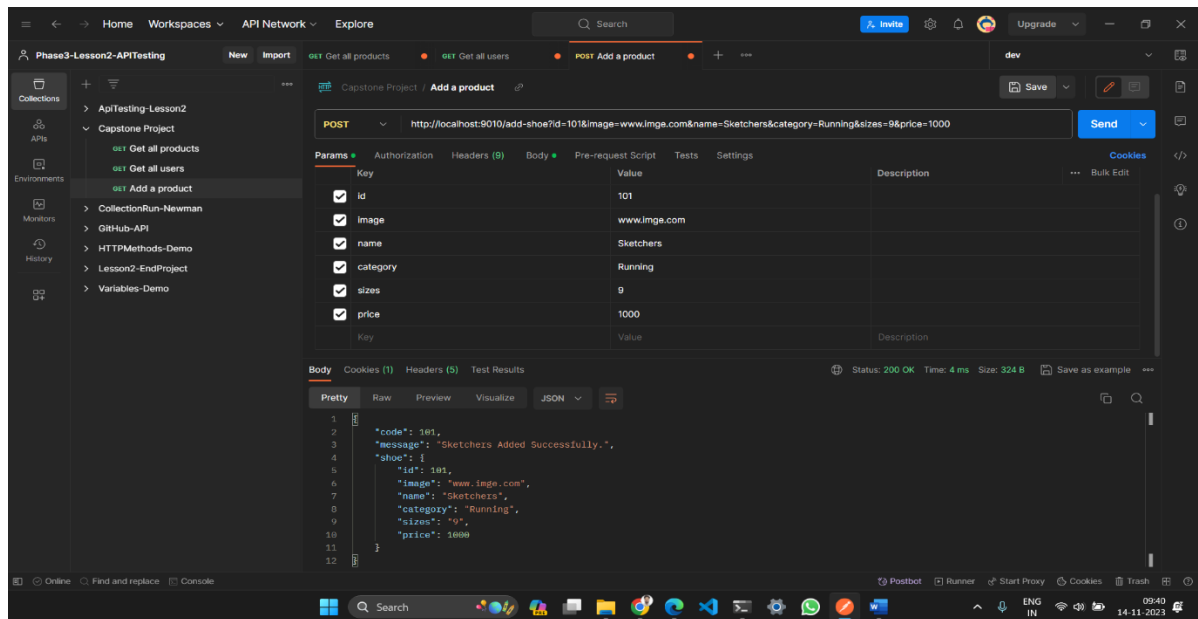

---

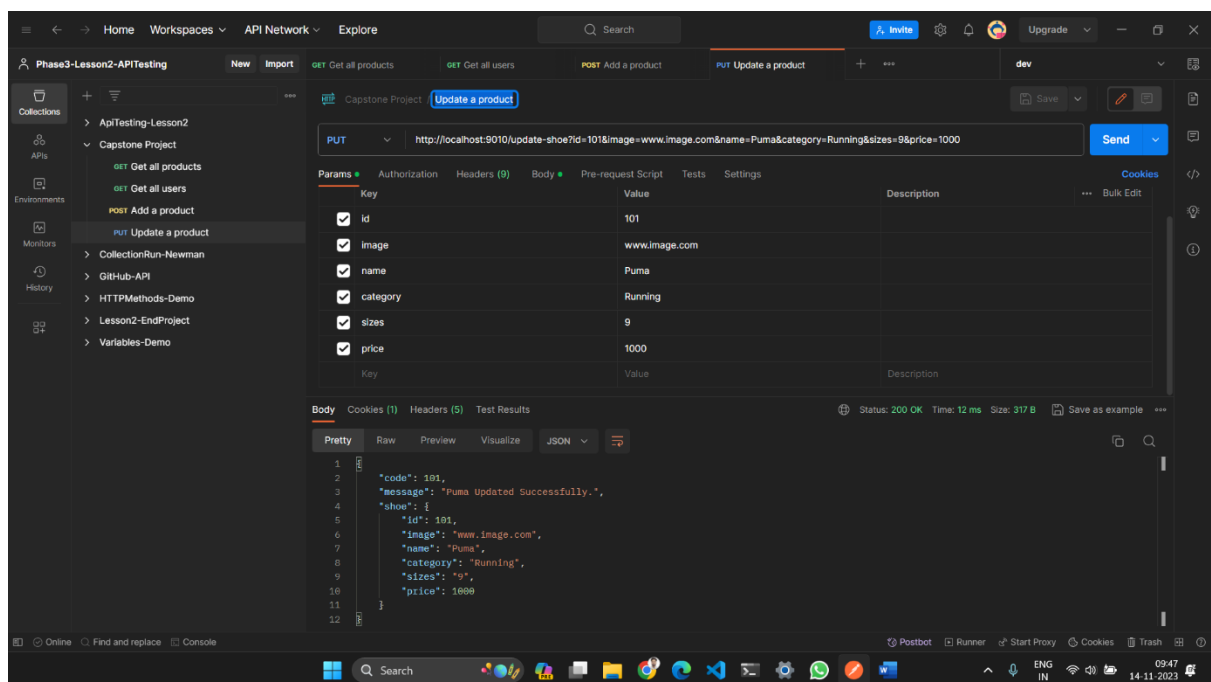

## Step 2.1: Get all users using GET Request

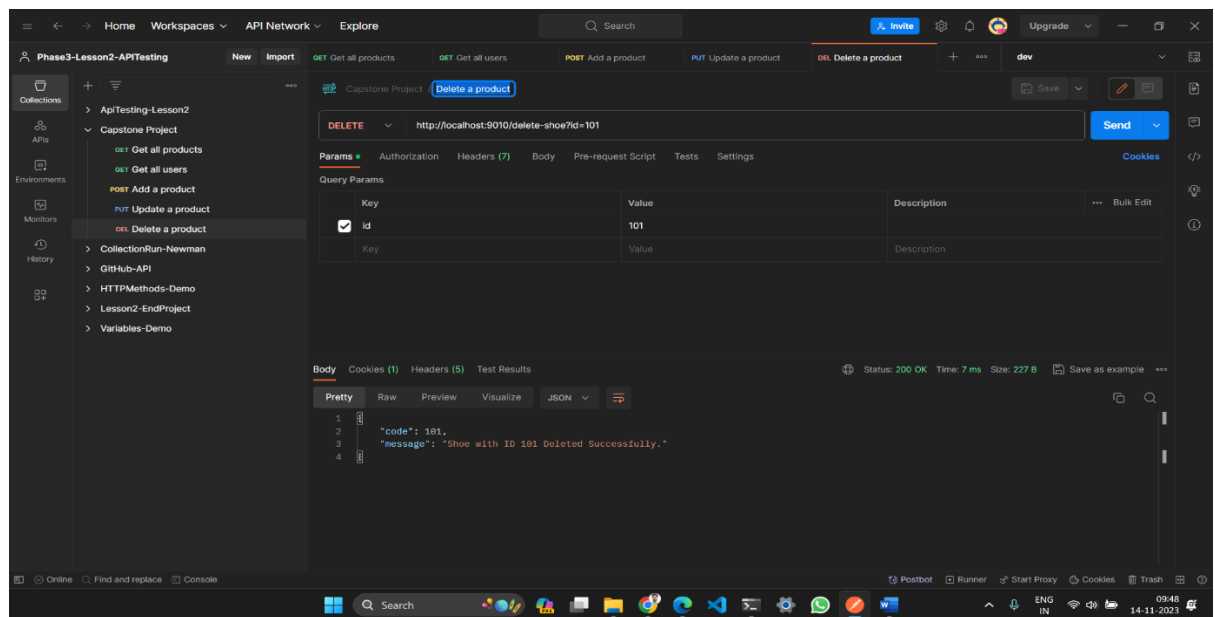

## Step 2.3: Add a product using POST METHOD

## Step 2.4: Update a product using PUT METHOD

## Step 2.5: Delete a product using DELETE Request

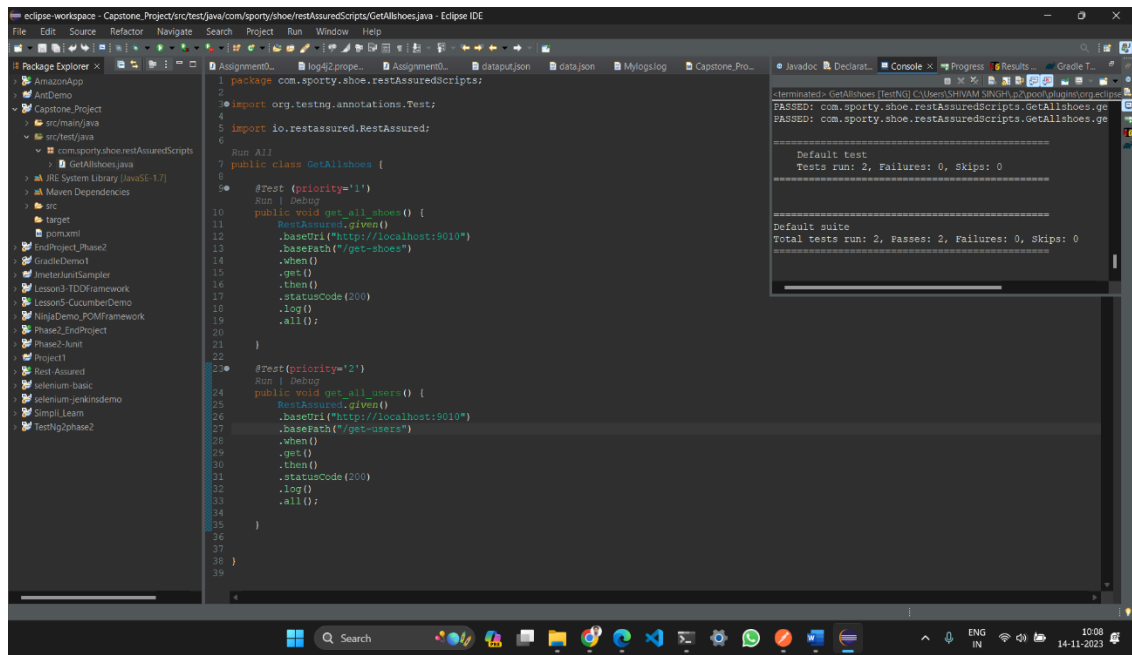

## Step 3: Implementing Rest Assured Methods:

Step 3.1: Create a maven project by the name Capstone\_Project

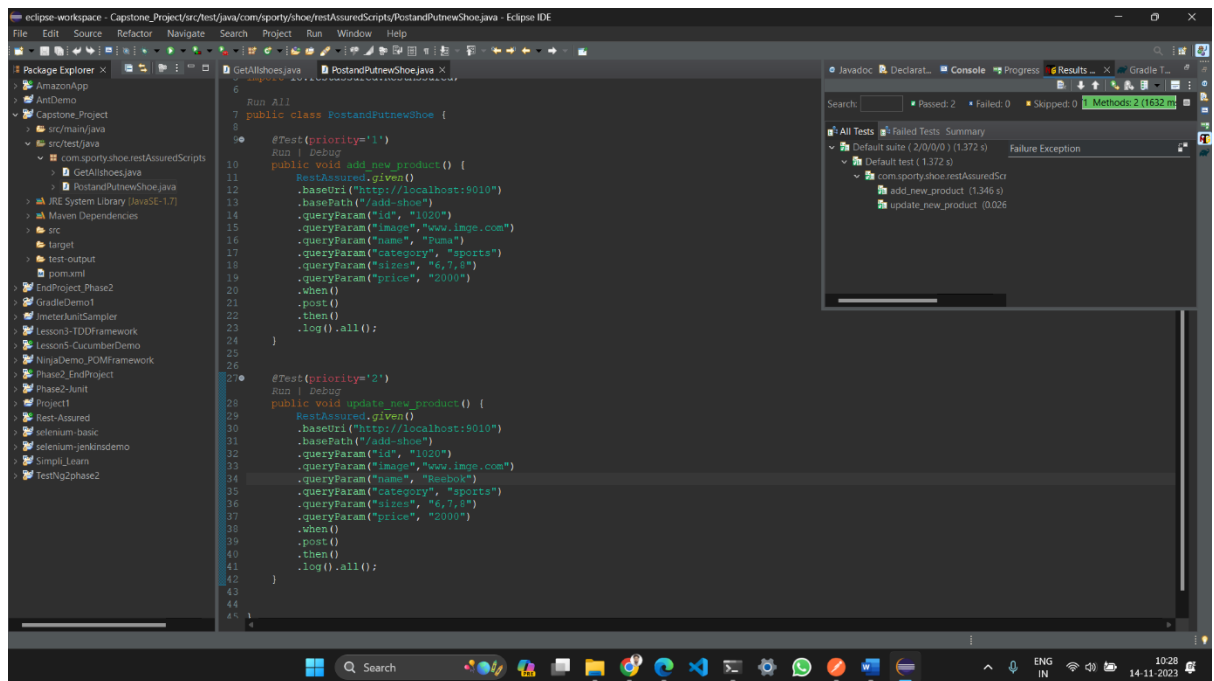

Step 3.2: Add the required dependencies in the pom file.

Step 3.2: Create a package by the name  
`com.sporty.shoe.restAssuredScripts`

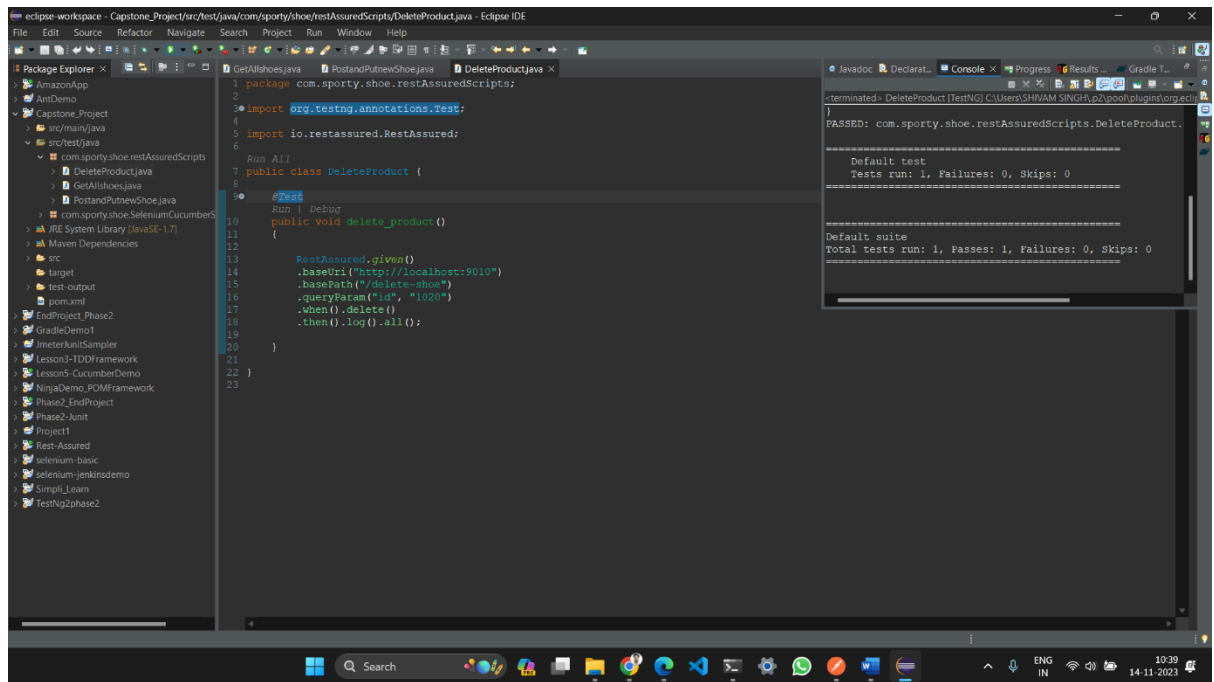

Step 3.3; Create a package where the code for GET Method is  
scripted

## Step 3.4: Create a class for POST and PUT Method Request

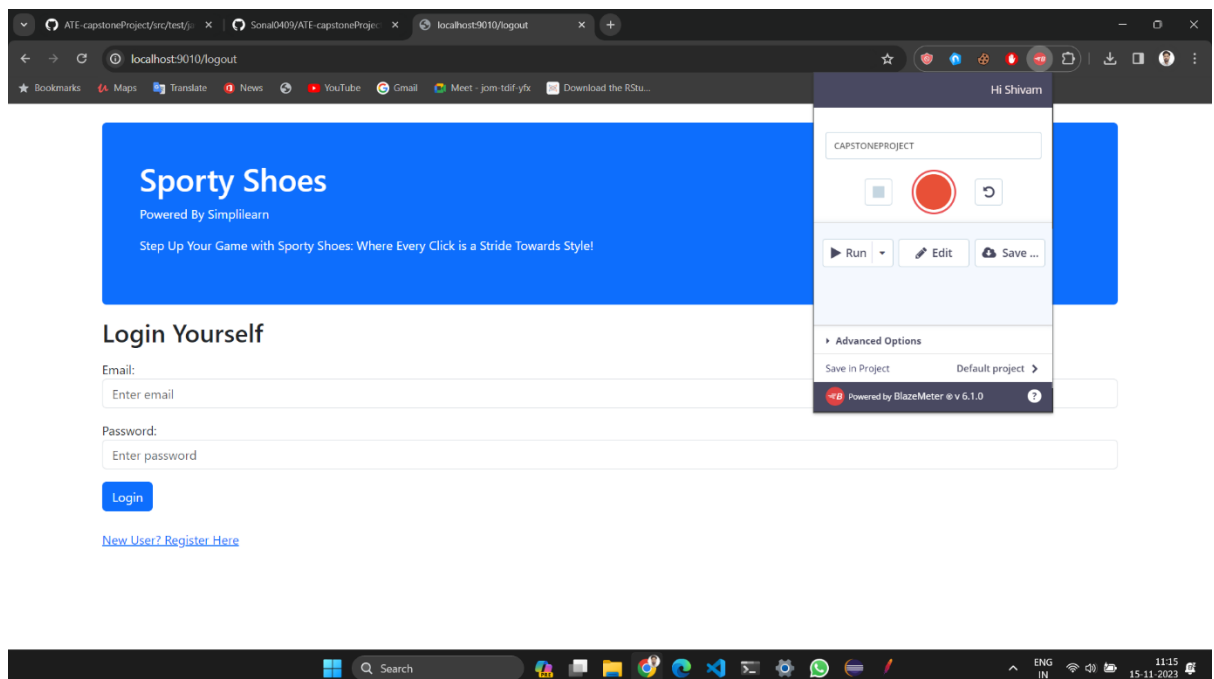

## Step 3.5: Create a class for DELETE Request

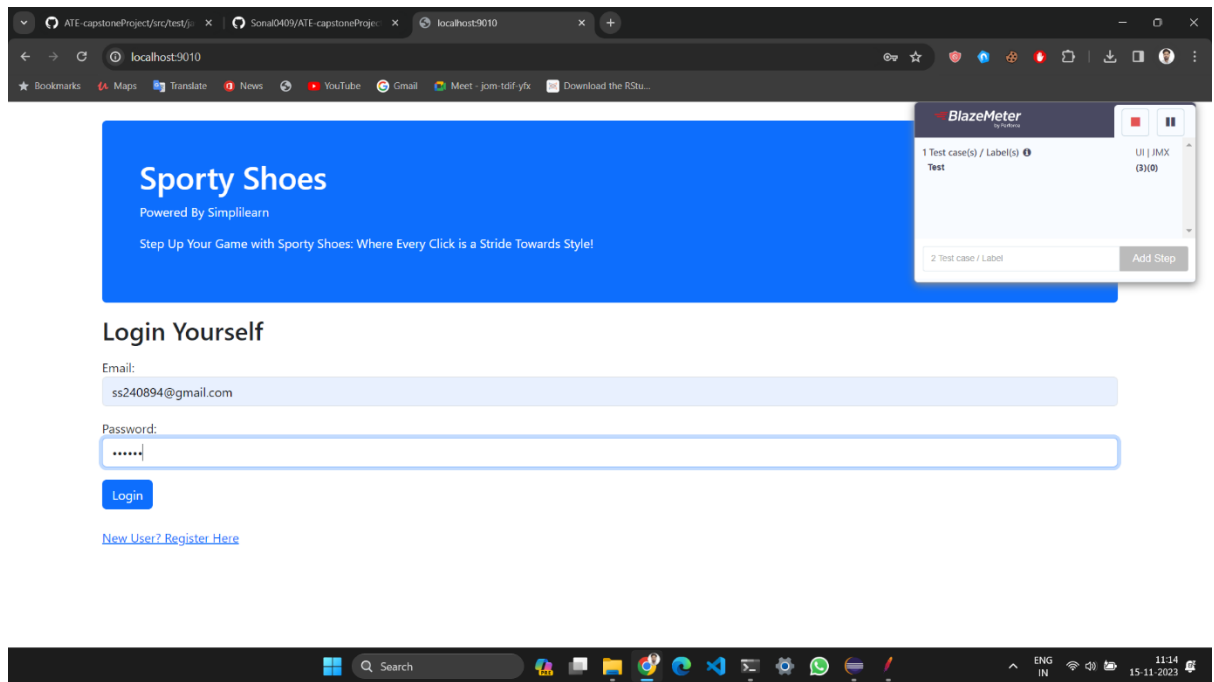

## Step 4: Load Testing using Jmeter:

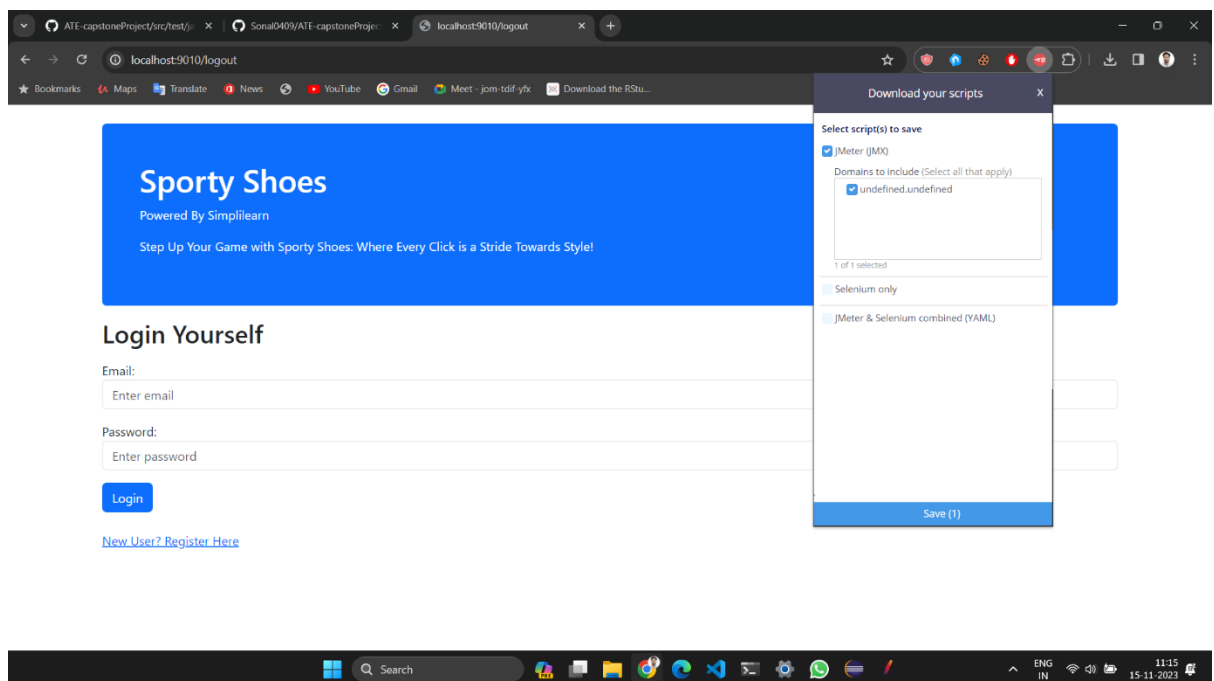

Step 4.1: Log in to blazemeter and start recording the steps.

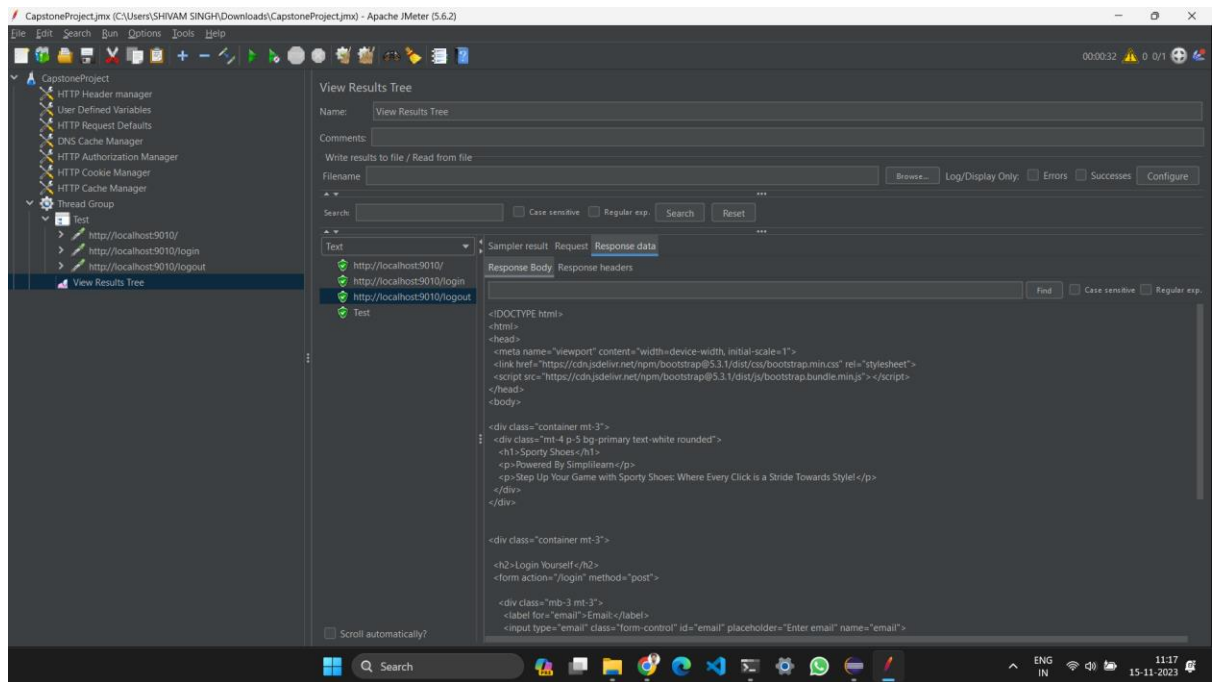

Step 4.2: Save the jmx file into your local device and open it in jmeter.

Step 4.3: Run the JMX file in Jmeter and check for the results.

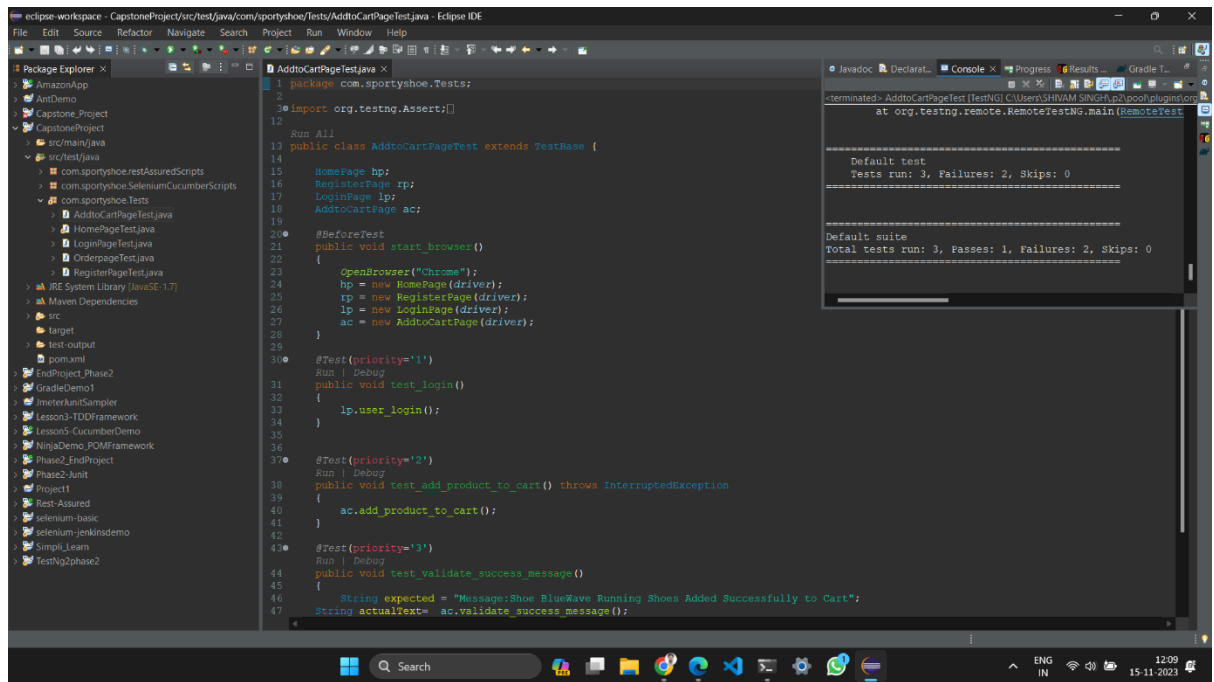

## Step 5: Browser-based end-user testing using Selenium WebDriver with TestNG Framework

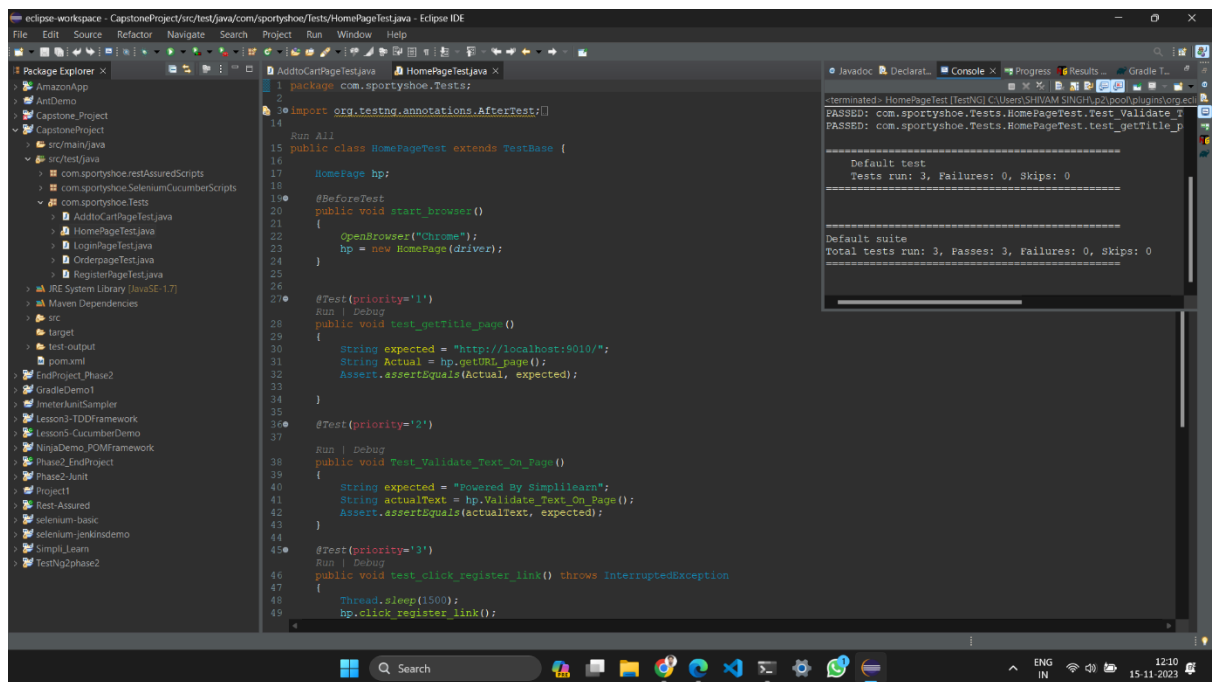

Step 5.1: We created a maven project by the name of CapstoneProject

Step 5.2: We declared two packages for Selenium Scripts and Tests

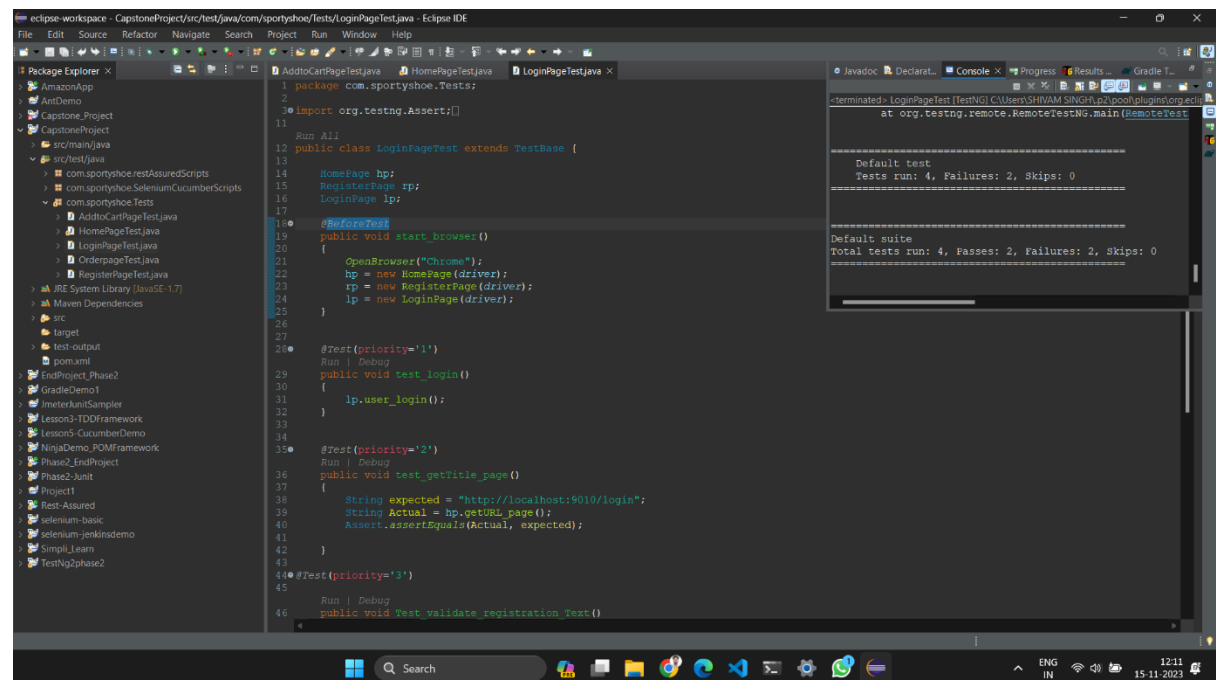

Step 5.3: Add to cart test case

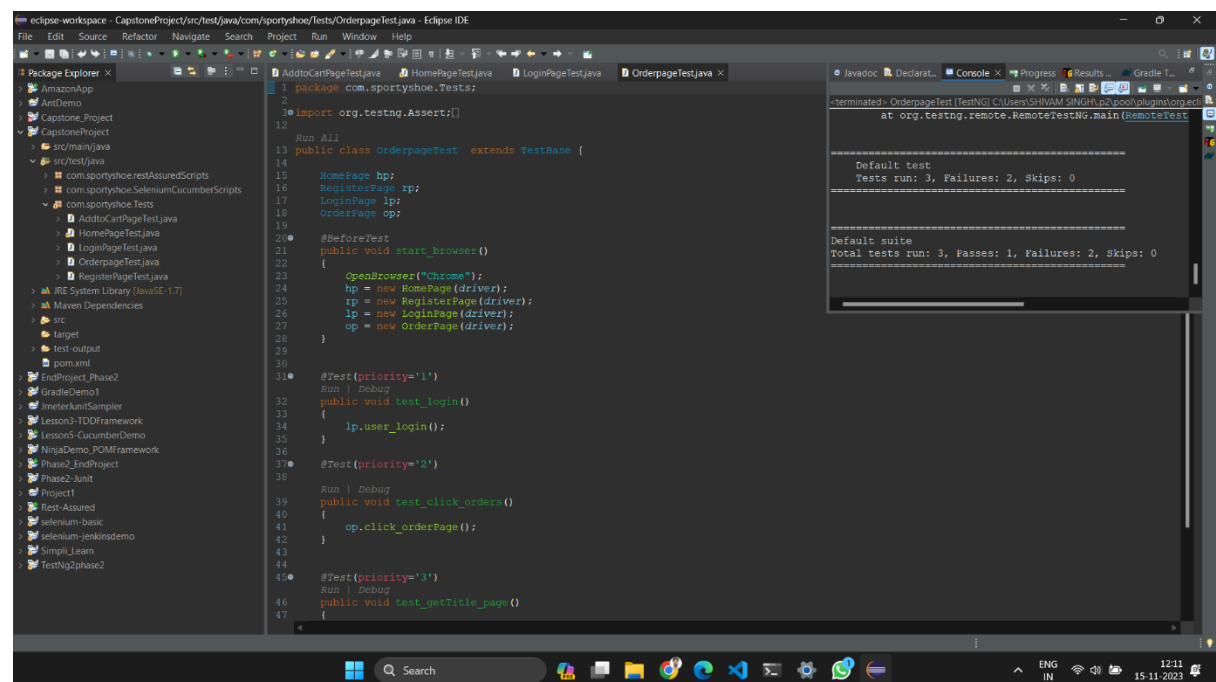

## Step 5.4: HomePage Test

## Step 5.5: Login Page Test

## Step 5.6: OrderPage Test

## Step 5.7: RegisterPage Test
